

INSTRUCTIONS - **AGC2** - Adjustable Gun Cradle Kit for Chairs with Central Back

Consider **AGC1!** If you fit AGC1 you can use your chair for Spotting Scope, Camera and Binoculars as well as Gun Cradle, by using the Quick Release System! If the QR System is not for you, fit AGC2. Because you don't need the new bracket and Quick Release, AGC2 costs much less.

FOR CHAIRS WITH THIS SET-UP

For people not interested in Optics See AGC1

AGC2 – ADJUSTABLE GUN CRADLE KIT

Cradle Adjustment: The two halves of the cradle mate together quite solid for obvious reasons. Slacken the Lock Lever, you may need both hands to open the jaws.

With the rifle forend in the cradle squeeze the jaws together until they hold the forend to your liking, then re-lock the lever. It's as easy as that!

If you want to change the height of the Gun Cradle, undo the collars with the 3mm hex key and adjust to your preference. NOTE: secure one of the collars first, then squeeze other collar until it sandwiches the bracket tightly, then lock that collar in place. If the cradle rocks! It means you haven't squeezed them together tight enough, so undo one of the collars, apply more pressure then re-tighten the grub screw. If done correctly it will not rock but will still rotate.

"I have several different rifles but typically use one of them most of the time, so the cradle stays set for that rifle! Obviously if I use a different rifle I simply reset the Gun Cradle Jaws to that rifle".

1. Take the existing cradle off using a 13mm spanner.

3. Loosen the bottom collar with the 3mm hex key

6. Replace the washer then the collar

Min. 45mm to Max. 65mm adjustment

11. Slacken the Lock Lever to enable you to open the jaws of the gun cradle.

2. Drill the existing 8mm hole with a 12mm drill bit. You may need to ream the hole out a little further to take the 12mm powder coated stem. De-burr to avoid scratching.

4. Take the bottom collar and washer off the stem.

7. Squeeze the two collars together tightly then tighten bottom collar. See Method above!

Please study Cradle Adjustment

5. Insert the stem into the hole.

8. FITTED!
