

INSTRUCTIONS – **AGC3** – Adjustable Gun Cradle Kit – for Deben and Buffalo River Bench Rests

DEBEN & BUFFALO RIVER BENCH RESTS

AGC3 – ADJUSTABLE GUN CRADLE KIT

www.idleback.co.uk

Cradle Adjustment: The two halves of the cradle mate together quite solid for obvious reasons. Slacken the Lock Lever, you may need both hands to open the jaws. With the rifle forend in the cradle squeeze the jaws together until they hold the forend to your liking, then re-lock the lever. It's as easy as that!

Min. 45mm to Max. 65mm adjustment

1. Take off the original 'V' Rest.

3. Once in place, it adjusts up and down like the original 'V' Rest.

See Cradle Adjustment above

2. It is more than likely you will have to ream the hole out with 12mm drill bit to fit the new stem. Because the new stem is powder coated this adds a little thickness.

4. FITTED
