

# INSTRUCTIONS – **AGC4** - Adjustable Gun Cradle Kit - for Primos Trigger Sticks

[www.idleback.co.uk](http://www.idleback.co.uk)

**AGC4 TO FIT PRIMOS TRIGGER STICKS**

**AGC4 – ADJUSTABLE GUN CRADLE KIT**

**OPTICS!** Take advantage! With this system you can use your Trigger Sticks for Spotting Scope, Camera and Binos! Using the Quick Release System! - Buy additional QR plates, attach a plate to the optic, detach the Gun Cradle from QR base, attach the optic to QR base and away you go! Simple!

**Min. 45mm to Max. 65mm adjustment**

**Cradle Adjustment:** The two halves of the cradle mate together quite solid for obvious reasons. Slacken the Lock Lever, you may need both hands to open the jaws. With the rifle forend in the cradle squeeze the jaws together until they hold the forend to your liking, then re-lock the lever. It's as easy as that!

1. Unscrew the existing 'V' Rest from the top of the trigger stick. This reveals the 3/8" thread on to which the **AGC4** is screwed.

2. Screw **AGC4** on to 3/8" thread on the top of the trigger stick.

Make sure the QR base is firmly screwed to the stick.

You cannot control the direction of the base plate! It's position is determined according to the thread limit

3. You can see from this eg, the jaws of the gun cradle are at right-angle to the stick trigger and grip. To set this position, follow steps 4, 5, 6..

QR plate securing screw

4. To adjust the cradle to align with the stick trigger and grip! Loosely tighten the plate screw so it can still turn.

5. Insert the QR plate into the base as shown. Turn the Gun Cradle until the gun cradle faces forward towards the stick trigger and grip.

6. While holding them in position, detach them from the QR base and tighten QR plate securing screw (4) tight

10. Ready to go!

ENJOY SAFE SHOOTING
