

## Base Mount Kit – Fitting Instructions

trev@idleback.co.uk

Kit includes:

3 x Ratchets with Straps

3 x Metal Loops

3 x Fixing Plates

6 x Fixing Nuts and Bolts

Important:

Extend the legs to the 2<sup>nd</sup> hole creating a gap at the top of each leg.

This is where the strap goes.

Mark your base at the bottom of each leg just to the side of the leg points.

Bolt the Metal Loops and Fixing Plates to your base.

You are now ready to thread.

I found this demo on using a ratchet strap should you need it.

<https://www.youtube.com/watch?v=LG42IKrcsZs>

Do not over tighten the ratchet straps  
You will damage the legs.
